# **BIG BUSINESS'**

## **Two-Faced Approach to Arbitration**

Big Business is happy to support arbitration when it's in their best interest. But when it comes to negotiating contracts with their workers, Big Business would rather use delay tactics to avoid paying better wages and benefits. It's only fair that corporations agree to arbitration for workers who are trying to negotiate a first contract after forming a union. **Arbitration is a key part of the Employee Free Choice Act that will let both sides reach a fair agreement.**
